

# TRAINING - EFFICIENT REGIONAL BIOMASS LOGISTICS AND INFRASTRUCTURE

CHALLENGES AND BEST PRACTICES

**SCALE UP**  
community-driven  
bioeconomy development

## INVITATION

Join us for an engaging and insightful three-day Training Program on regional bioeconomy value chains

### WHY

The costs of harvesting, transporting, storing and handling biomass are prime determinants of overall biorefining costs. Thus, it is vitally important to develop local biomass supply systems that can efficiently supply end-users with sufficient raw material that meets their specific quality and seasonal demands.

### WHAT

Deeper insights into the challenges and solutions connected to developing a local biomass supply system

### WHO

Industries, SMEs, farmers, public authorities, research & academia, civil society organization acting in bioeconomy value chains in SCALE-UP regions (Northern Sweden (SE), Mazovia (PL), French Atlantic Arc (FR), Upper Austria (AT), Strumica (MK), Andalusia (ES), Community of practice).

### LANGUAGES

- Presentations in English and/or local languages
- Breakout rooms in local languages
- Real-time translation (subtitles) will be available

### ABOUT SCALE-UP

SCALE-UP is working with 6 regions in Europe to fully exploit their bioeconomy potential, and to achieve high level of awareness and understanding of the bioeconomy and its potential and impacts among local communities. Find more information on the project:
