Mission HoSt Group
 Why we do what we do

About HoSt Group

Empowering sustainability ambitions

Solving the biggest challenge of our generation – the energy transition

2

About HoSt Group

3

3

Achtergrond

BEON – Biogene CO₂ inzet

CO2 Production

Vergisting producten

- Digistaat
- Groen gas
- Biogene CO₂

🌿 Inzet van biogene CO₂

- Vervloeiën (opslag)
- Food-grade
- Grondstof

4

HOST GROUP

4

Achtergrond

BEON – Biogene CO₂ inzet

Methanol productie

Duurzame waterstof

- Duurzame stroom
- Decentraal opgewekt

Biogene CO₂

Productie van e-methanol

- Vloeibaar op standaard condities
- Opslag van elektriciteit/H₂
- Brandstof
- Grondstof

5

HOST GROUP

5

BEON – Biogene CO₂ inzet

Energie opslag

Biogene CO₂

Duurzame waterstof

- Duurzame stroom
- Decentraal opgewekt

Eigenschappen van e-methanol

- Vloeibaar op standaard condities
- Biodegradable
- Vriendelijke synthese (selectiviteit)
- Brandstof
 - Energiedichtheid
- Grondstof
 - Drop-in
 - Meerdere pathways

HOST GROUP

7

Achtergrond

BEON – Biogene CO₂ inzet

Decentrale product

Biogene CO₂

Duurzame waterstof

- Duurzame stroom
- Decentraal opgewekt

Decentrale aanpak

- Grondstoffen zijn decentraal
- Energie hub principe
- Congestie problematiek

BEON – Biogene CO₂ inzet

Flexible production

- 🔌 **Biogene CO₂**
- 🔌 **Duurzame waterstof**
 - 🔌 Duurzame stroom
 - 🔌 Decentraal opgewekt
- 🔌 **Energie wordt dynamisch**
 - 🔌 Renewables toename
 - 🔌 Capaciteit oplossingen
 - 🔌 Dynamische systemen
 - 🔌 Prijs effecten BC's

Achtergrond - samenvattend

BEON – Biogene CO₂ inzet

Resumé

- 🔊 **Biogene CO₂ (Bright Renewables)**
- 🔊 **Duurzame waterstof (Hygear)**
- 🔊 **Productie van e-methanol**
- 🔊 **Decentrale aanpak**
- 🔊 **Eigenschappen van e-methanol**
- 🔊 **Energie wordt dynamisch**

**decentrale dynamische
methanol productie**

Benelux's first e-methanol plant to be opened in Arnhem

GREEN+ - The University of Twente joined forces with HyGear and Bright Renewables to build a plant to produce e-methanol, a fuel alternative to conventional ones.

NEWS 11 MAY 2024

HOST GROUP

11

TANDEM

Towards Acceleration aNd Demonstration of E-Methanol

Methanol technology

- 🔊 **Methanol technology developed at UT**
 - 🔊 Liquid Out – Gas In Concept (LOGIC)
 - 🔊 PhD work ('13-'19)
- 🔊 **Circulation based on natural convection**
- 🔊 **BIO-LOGIC ('21 – '23)**
 - 🔊 BICYLCE feasibility study (UT-HoSt-TNO)
 - 🔊 Indirect heat exchange gives more process control
- 🔊 **TANDEM follow-up (>'24)**

12

HOST GROUP

12

TANDEM

Towards Acceleration aNd Demonstration of E-Methanol

Project

R&D project HoSt group (RVO gesteund)

- Fonds vanuit GroenvermogenNL (DEI+)

Towards Acceleration aNd Demonstration of E-methanol

Demonstratie project:

- University of Twente (PhD research)
- Hygear (electrolyser, physical site)
- Bright (Methanol reactor, overall plant)

Runtime today – 2028

First methanol mid 2026

13

HOST GROUP

13

TANDEM

Towards Acceleration aNd Demonstration of E-Methanol

Approach

Integratie van de LOGIC reactor technologie met een electrolyser voor **decentrale dynamische methanol productie** op MW schaal

Validatie & referentie dankzij demonstratie in de 'buiten' wereld

Productisation van synthese technologie

E-methanol route

- H₂ vanuit electrolyser
- CO₂ vanuit biogas process
- Synthese technologie klaar maken voor andere synthese opties

14

HOST GROUP

15

16

TANDEM

Towards Acceleration and Demonstration of E-Methanol

Outlook

Realisatie van TANDEM ('26)

- ▀ Demonstratie technologie
- ▀ Ontwikkeling BC's

Opschalen naar 0.05-0.5 ton/h ('26-'28)

- ▀ In de markt zetten als product
- ▀ Opschalen via meerdere lijnen
- ▀ Integratie met biogas systemen

Ontsluiten van decentrale.... (>'28)

- ▀ Duurzame energie
- ▀ Biogene CO₂
- ▀ Aanjagen nieuwe energie systeem
- ▀ Aanjagen E/bio-fuels market
